

VCALL WEB EVENTS

INTERACTIVE EVENTS THAT MAKE AN IMPACT

Since 1997, Vcall® has provided innovative technology and professional services that enable organizations to communicate through compelling and influential web events.

Vcall is a proven leader in executing critical events for large, global audiences. Our innovative technology combines ease of use with extensive interactive features to meet the needs of your organization. Vcall gives you superior results by delivering more features and services than other webcasting and web conferencing products..

EASY TO PRESENT AND ATTEND

- Simple, intuitive interface
- No downloads required for participants or presenters
- Delivers presentations through firewalls or 28k speeds
- Unlimited number of presenters with no "hand off" required

INTERACTIVE TOOLS GIVE YOU INSTANT FEEDBACK

- Tools include: multiple choice polling, surveys, free form flip chart, evaluations, tests, brainstorming and more
- Unlimited evaluation forms with yes/no, multiple-choice, scaled and fill-in-the-blank questions
- Full-featured, presenter-controlled Q & A
- Whiteboarding and annotations on-the-fly
- Robust post-session reporting gives you instant reports by session or individual

FLEXIBLE PRESENTATION OPTIONS

- Display PowerPoint, Flash animation, video – virtually any type of content
- Deliver audio by VoIP, streaming, or teleconference call
- Live or pre-recorded video streaming
- Customize the presentation area with your logo and signature graphics; change the color of the interface to reinforce your corporate branding
- Use Vcall at any time for an unlimited number of presentations or events
- Flexible pricing is available per event (flat rate), per seat, or per minute.

Successful web events...Guaranteed!

VCALL WEB EVENTS

POWERFUL OPTIONS

- Application broadcasting – use AppCast™ to share your desktop or provide live software demos
- Web tours – pre-staged or on-the-fly. Can be navigated by audience or links can be turned off
- Scrolling marquee lets you send instant announcements without interrupting the presentation
- Annotate and add pointers to your slides on-the-fly
- Present in multiple windows in the user interface
- Provide access to documents, PDF files, slides or other resources
- Optional Closed-Captioning (Section 508 compliant)

GUARANTEED SECURITY & RELIABILITY

- Unmatched technical support for both presenters and participants before, during, and after your event
- Clustered server architecture effortlessly supports even large-scale events
- Instantaneous back-up of your content and data from participant interactions
- Physical and electronic server-side security
- Client-controlled password login
- Link Specific Security™ (LSS) combines URL & PIN access unique to user
- Content download can be blocked
- “Expel” feature gives you complete control over who attends
- Optional SSL encryption

ON DEMAND EVENTS

- Optional web event archives (Replay). Include slides, streamed audio/video, document download/print/view, text Q&A and even live polling and other interactive features.
- Save your web event as an MP3 podcast for podcasting; CD and audiocassette recordings are also available

COMPLETE EVENT REPORTING

- Reporting provides data by session and by individual.
- Profile reports show Q&A with participants' names and responses to polls.
